Bathtub: inspected for scratches, chips or other defects		
Bathtub: enclosure and floor, caulking is complete		
Tub faucet has been caulked		
Tub and/or shower faucet: hot and cold are correct		
Shower: inspected for scratches, chips or other defects		
Shower: Tile showers, check weep holes in pan, should be clear. (SEE DETAIL)		
Shower: enclosure and floor, caulking complete		
Shower door installed correctly, clean and checked for defects		
Toilet: Seat has been inspected for scratches or defects		
Toilet: inspected for defects and leaks; adjusted properly; caulking complete		
Light fixture installed level; checked for defects; all bulbs checked		
Mirrors: properly installed and defect free		
Utility Room	$\overline{\Delta}$	
Flooring: clean; checked for tears, nicks and squeaks/deflections		
Walls: inspected for defects and TU complete		
Laundry shelf complete; rod is installed and stained		
Cabinet doors scratch free and functioning properly; scribe complete		
Cabinets clean inside and out and shelves installed		
Exhaust fan/timer checked and working properly (if applicable)		
Sink: checked for scratches or other defects; caulking complete		
Sink: pipe fittings are tight and there are no leaks		
Backsplash free of defects - caulk/grout Schlueter metal installed correctly		
Windows: proper install, operation, screen and locks		
Windows: clean, includes excessive paint and caulking on frames		
Baseboards: caulking and paint TU is complete		
Doors: TU complete for door, jamb and trim; stops installed and knobs complete		
Outlets/GFIs: have been checked and are level/straight		
Light fixture is clean, checked for defects; all bulbs checked		
Washer hook-up not leaking (if applicable)		
Washer hook-up and trim is complete, clean of paint and drywall mud		
Dryer vent complete, sticking out min. of 2"		
Attic	\overline{A}	$\overline{\mathbf{V}}$
Insulation in place		
Heat tape is installed and working properly (if applicable)		
Float switch is installed and working property (if applicable)		
Attic light in place and working		
Verify primary and secondary condensate lines are properly installed		
31 3 1 1 3		
Verify condensate pan is clean		
Verify condensate pan is clean Verify BOLT is installed in Roof Anchor (s) 2-3 might be required per SQ Ft of home

Crawlspace has been checked for leaks at plumbing systems with running water		
Crawlspace radon checked (if applicable)		
Crawlspace is clean and any wood/debris has been removed		
Garage	\square	$\overline{\square}$
Garage has been hosed out; clean of excess paint/stains/drywall mud		
Garage slab sloped properly; correct amount of cut/tooled joints		
Garage slab has slope or a lip where garage door contacts slab to prevent water intrusion		
Garage door opener works properly; light bulb checked		
Garage door remotes (attached to opener or in kitchen drawer)		
Garage door latches correctly and pre-wiring complete (if no GDO installed)		
Water heater lines have pipe insulation, ballard if needed		
Water heater set properly; no gas or water leaks		
Water shut off valve verified installed and working		
Sprinkler system timer has been checked and set up		
Outlets/GFIs: have been checked and all work		
Electrical panel is clearly labeled; Sherwin paint codes sticker in place		
Light fixtures: checked for defects; all bulbs checked		
Attic access checked (if separate from interior access)		
Mandoor: installed correctly and no gaps under threshold		
Mandoor: inspected for any defects and TU complete		
Mandoor: weather stripping installed and threshold adjusted, no gaps below or on sides		
Mandoor light fixture inspected for defects, bulb checked		
Door knob and deadbolt installed - functions properly		
All sheetrock voids / nails / screws covered and filled properly		
Exterior	\square	
Dranarty pine located varified and marked with stakes (ALL FOLID)		
Property pins located, verified and marked with stakes (ALL FOUR)

Entry door and trim: all TU complete no defects	
Threshold is clean and free of defects	
Entry door: knob/handle set inspected for defects	
Columns: straight, plumb and capped	
Columns: caulk and paint TU complete	
Landscaping: check valve box for leaks	
Landscaping: clear and free of trash	
Landscaping: sod, plants, trees and bark mulch/rocks complete	
Sprinklers adjusted properly, not hitting the home	
Siding: nailing checked for over/under driven; caulk and TU complete	
Siding: checked for damage and is defect free	
Soffit: nailed correctly; no excessive gaps; caulking and paint TU complete	
Trim, shutters and plant shelves: checked for damage; caulking and TU complete	
Exterior: all caulking and paint TU is complete	
Windows: checked for Low-E; clean, includes excessive paint and caulking on frames	
Screens are in place and in good condition	
Rear patio: clear of debris and hosed off; proper slope	
Fencing/gates complete with no defects, stain complete (if applicable)	
Decking: complete and stairs/railing finished properly (if applicable)	
Grading: rough grade in back complete; debris, trash and large rocks removed	
Grading: 6" of fall away from foundation	
Grading: checked for proper drainage and compaction	
Gutters / downspounts drain away from home (if applicable)	
Drip edge is complete (if applicable)	
Fascia: nail and joints have been caulked	
Roof: visually inspected and no defects found	
Roof: flashing checked, vents, test caps all checked	
Foundation: all vent screens are in tact; vent wells installed where needed
